

These are the ingredients for my cookies.

Salt and sugar are compounds.  
Salt is made up of the elements \_\_\_\_\_ and \_\_\_\_\_.

Sugar is made up of the elements \_\_\_\_\_, \_\_\_\_\_, and \_\_\_\_\_.

I am dissolving  
sugar into  
water. This will  
create a

\_\_\_\_\_.

(mechanical  
mixture or  
solution?)

After a lot of shaking, my icecream finally turned into a solid! This is an example of a \_\_\_\_\_ (physical or chemical?) change because \_\_\_\_\_.
